

Quality Policy

BridgePoint is a company specialising in the development of testing solutions for industry. Its software and hardware expertise is recognised by the most prestigious companies in the domestic market, particularly in the automotive sector.

BridgePoint is committed to establishing itself as a benchmark company in its sector, both for the professionalism, qualifications and technical experience of its human resources and for the excellence of the service provided to customers and the relationship established with other stakeholders.

We seek to offer a specialised, high-quality service that supports our customers and meets their requirements and expectations, thereby earning their trust and satisfaction.

BridgePoint always operates in accordance with legal and regulatory requirements.

The continuous improvement of processes and procedures and the enhancement of the human potential of our human resources will always be the pillars of the company's sustainability and its distinguishing factor.

“Together with quality, we make a difference along the way, so that success is always our destination.”
